

I. Employees Connecting a Registered iPhone or iPad for Full Access

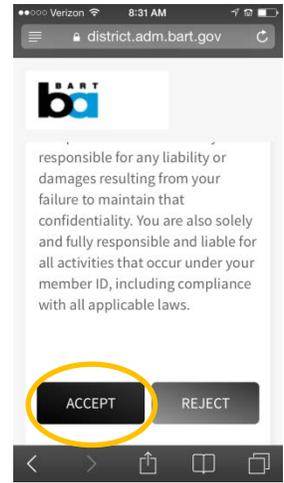

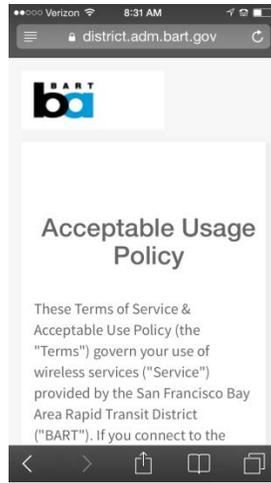

1. Select **Settings** on the desktop.

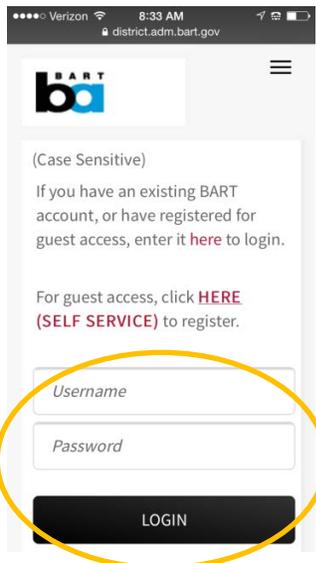

2. Select **DISTRICT** in the list of available networks.

- Exit Settings and open the **Safari** Browser. Go to any website. Your attempt to brows the network triggers the BART Acceptable Usage Policy Page. After reading the policy, click **Accept** to agree and to continue.

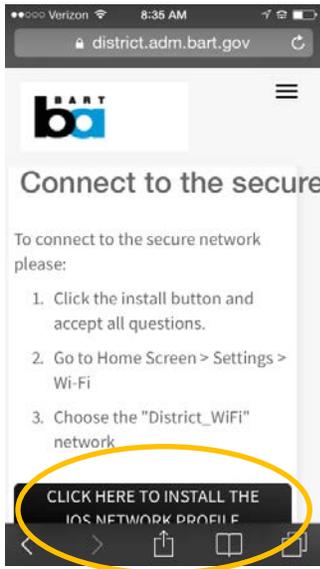

- If you have an existing BART account, enter your network **username** and **password**. Click **Login**.

5. In order for BART Employees to access secure District resources over a wireless network, i.e. email, network drives and enterprise applications, you **MUST** install SMART CONNECT. Click Smart Connect.

6. Click the "Click here to install the IOS network Profile" link.

7. Click **Install**. Click **Install Now** to install the Root Certificate.

8. Enter your **device passcode**. Your passcode unlocks your phone. Click **Done**.

(This page displays instructions only)

9. Verify that **District_WiFi** is the selected access point.

II. Employees Connecting a BART Laptop for Full WiFi Access

All BART District owned laptops should be configured to auto connect to District_Wifi for network and internet access. If you can see "District" in your list of available networks, but your device does not connect, please call the Help Desk at ext. 7208 for service.
